

Who's your baby? • See & honor your child's unfolding development

RIE® Parent-Infant Guidance™ Classes offer individual attention to both parent(s) and child in a safe and challenging play space for observation and demonstration based on The Educaring® Approach.

RIE® Certified classes for families with children from birth to age two are held in a peaceful setting that encourages babies and young toddlers to become attentive, active explorers. But it's not just child development...

Parents develop too, and are the natural experts, learning from their own child, other parents and babies as well as from the parent educator/facilitator.

"I have been able to use so much in my life that I learned in RIE®. It enlightened me about my own childhood, and about me as an adult, and a parent. I am more able to separate my own feelings and shortcomings from the experience of my child. I think I have become more patient with myself and with my child (age three)." – RIE® parent

CLASSES meet weekly for 1.5 hours in eight-week sessions limited to six to eight infants at a similar stage of movement development and their parents. Classes are held in Ojai and

10400 Wilshire Blvd. WLA 90024
1943 Meiners Rd, Ojai 93023

"Encourage your child's natural abilities from the very start." Magda Gerber, Your Self-Confident Baby

Become the parent you can be - a caring observer of your child. Gain confidence in yourself and trust in your baby's unique ability to show you the way to nurture and respect him/her.

Create an optimum home environment for parents' needs as well as the baby's secure development - *without expensive toys or equipment* - that can provide BOTH freedom and clear limits to promote secure attachment, harmony and self-awareness.

"You'll see infants with new eyes."
